Cosmetics perfectly filled

Gels, creams and fluids

Amongst others, ViscoTec is a specialist in manufacturing emptying, dosing and filling systems for the food and cosmetics sector. Particularly for high viscosity products – and thereby complex products when it comes to processing – the ViscoTec lines are perfectly suited for and they can be treated smoothly. Fluids and pastes, like Mascara or Vaseline, are removed carefully from barrels by emptying units before they are forwarded to ViscoTec dispensers, from where they can be dosed and filled precisely. The adjustable suck back of the dispenser guarantees a dosing without dripping or stringing.

Perfect emptying and dosing results are based on easy handling, in combination with a hygienic design. Barrels can be emptied almost completely (less than 1% residual material in the barrel) and fillings offer a high repeatability with less than 1% deviation.

ViscoTec systems have proved their worth: They are deployed successfully for cosmetics like cream, peelings, pastes, mascara, vaseline, shampoo, gels and much more. To this effect small volumes (like samples) can be dosed precisely and filled reliable.

Customers rely on the experience, the process know-how, the worldwide service and the ViscoTec support they benefit from. They receive perfect solutions for their individual cosmetic application.

ViscoTec – Perfectly dosed!

ViscoTec Pumpen- u. Dosiertechnik GmbH primarily deals with systems required for conveying, dosing, applying, filling and emptying medium to high-viscosity fluids. The technological leader headquarter is in Töging a. Inn (Bavaria). Furthermore ViscoTec has subsidiaries in the USA, in China and in Singapore and employs almost 120 people worldwide. Numerous sales partners all over the world complete the international distribution network. Next to technically sophisticated solutions to even the most complicated application, ViscoTec is the single point of contact to deliver all components for a complete system: from emptying to preparing and to dosing. This guarantees successful interaction of all components. All fluids showing a viscosity of up to 7.000.000 mPas can be conveyed and dosed almost pulsation-free and with extremely low shear. ViscoTec offers comprehensive consulting for every application and, if required, extensive tests will be carried out in close cooperation with the customer. The dosing pumps and systems are perfectly adapted to their respective application whether it is the food sector, the automotive industry, the aerospace field, the medical technology, the pharma area and many other branches.
