

## REACH declaration

As a manufacturer of pump and dosing technology, ViscoTec Pumpen- u. Dosiertechnik GmbH neither produces nor imports chemical substances. All of the delivered products are classed as “articles” according to the REACH regulation and, thus, are not subject to registration.

In the context of the REACH regulation, ViscoTec Pumpen- u. Dosiertechnik GmbH is a “downstream user”.

To our present knowledge, the manufactured articles do not comprise any components that contain substances included on the Candidate List (SVHC) from the European Chemicals Agency (ECHA) amounting to more than 0.1% of the mass of the object.

In accordance with REACH Section 33, any information we obtain from our suppliers is immediately passed on in the event that substances (>0.1% of the mass of the object) within the manufactured articles are classed as being of very high concern (SVHC). Furthermore, ViscoTec Pumpen- u. Dosiertechnik GmbH is committed to keeping track of updates to the REACH regulations – especially the expansion of the Candidate List and the inclusion of substances in REACH annexes (Candidate List of Substances of Very High Concern for Authorization, REACH Annex XIV) – and to aligning these with the information on the substances.

The substances and mixtures used in the manufacturing process are exclusively ones for which – in accordance with REACH – the supplier / distributing company has provided the prescribed information (EU MSDS).

ViscoTec Pumpen- u. Dosiertechnik GmbH would like to point out that, so long as none of the delivered articles contain any of the listed substances, there is no legal obligation to issue any confirmations.

This confirmation does not absolve the purchaser from verifying the suitability of the material for specific applications, from potentially having to apply to a relevant institution for approval for the intended use, or from ensuring compatibility with all of the legal and official requirements.

As a precaution, we would like to point out that any changes to the material (e.g. resulting from contamination during assembly) do not fall within our scope of responsibility.

These statements are based on our present knowledge and experience.

No warranty or liability shall be assumed for factors that lie outside of our knowledge and control.
