VIPRO-FEED

**AUTOMATED SUPPLY.
MAXIMUM RELIABILITY.**

Clean, consistent material feed – even for high viscosity and abrasive materials. No manual refills. No interruptions.

EFFICIENCY IN MATERIAL SUPPLY – AN AUTOMATED SOLUTION.

The vipro-FEED enables automated emptying from pails or barrels reliable, clean and process-safe.

Abrasive, medium and high viscosity materials such as adhesives and sealants or thermal paste are efficiently fed into the process.

INTELLIGENT EMPTYING - RELIABLE CONVEYING

Continuous, pulsation-free material supply directly from hoppers or buckets – for maximum system availability.

PRECISE DOWN TO THE LAST GRAM

Volume-accurate emptying without air pockets – for constant material supply and maximum dosing accuracy.

GENTLE MATERIAL HANDLING IN EVERY DETAIL

Abrasive, filled, chemically aggressive or shear-sensitive? Absolutely feasible: Homogeneous dosing with maximum precision.

FLEXIBLE USE - SEAMLESS INTEGRATION

For a wide range of container sizes, materials and viscosities – perfect for individual production processes.

PROFITABILITY MEETS DURABILITY

Robust, low-maintenance and easy to clean – for efficient processes and low operating costs.

MODULAR SYSTEM

Your system is individually adapted to your process – based on our process expertise and including engineering and project management.

Container sizes: 10 to 200 L
Flow rate: 320 to 2600 ml/min
For medium to high viscosity materials

The specifications depend on the emptying system type, on the process and the material to be emptied.
